

## J200 Electric Pump

1. J200 lubrication pump is used for single-line pressure relief and progressive lubrication systems.
2. It can be used for cartridges and portable detachable reservoirs.
3. Equipped with grease level switch and pressure switch, pressure regulator, safety valve and exhaust valve.
4. Wiring method is simple and reliable, easy to install and maintain.
5. J200 can be used in maximum pipeline length of 15 meters.
6. Widely used, such as CNC machine tools, machining centers, injection molding machines, non-standard automation, etc.

## Specification

Voltage	Output volume	Pressure	Interval time	Level switch	Stop signal	IP-protection	Certification
24VDC, 1.0A	7mL/min	5 or 8 MPa	Min 5 min	N.C.	N.C.	IP54	CE

## Order Code

**J200** □ □ □ □

- Operating pressure: 5 = 5MPa, 8 = 8MPa
- 1 = With controller; 0 = Without controller
- 1 = With low level switch; 0 = Without low level switch
- 2D = 0.2L detachable reservoir; 3D = 0.3L detachable reservoir; 5D = 0.5L detachable reservoir
- 4C = 0.4L with cartridge; 7C = 0.7L with cartridge; 0C = Cartridge version without grease

## Dimension
